

Can you please ensure that adequate parking is provided in the front of properties in any plans- especially houses and people are reminded that they have parking spaces on their property, otherwise allocate extra wide roads with the facility for parking along the roads so that emergency vehicles do not have to do a chicane as that is a danger for emergency vehicles.

The estate by the old dairy has wide paths and absolutely hardly any road width for 2 vehicles to pass each other - a big mistake by planners of the estate. Plus have heard that large vehicles on the estate have great difficulty negotiating and the buses are simply not routed there and residents have a long way to walk to get a bus on a bus route - not good planning at all is it??

Please ensure that roundabouts and or suitable traffic lights are installed at junctions joining other of the already established roads and have a thought to the people that use the roads for jobs and travelling from one area to another. Don't cut corners or make too large spaces which cause traffic more difficulty to negotiate left or right or across a road.

I have noticed a lot of mistakes made by planners as to accesses and width of roads all over the place and not just in Malvern with poor provision for on road parking.

Anne Steggles, Malvern.
