

COMMUNITY LED HOUSING IS.....

Much Wenlock Community Led Housing Project

A bottom-up approach to home-building that puts the needs of people first. By working collaboratively with the local authority, landowner and housing association, members of a CLH group can take ownership of their lives and control of their future. Because the prices are protected in perpetuity, future generations will benefit from them too.

A mechanism for empowering people to have a real say in the type and design of housing they want and to create something better.

Already having a hugely positive impact on communities and lives across the country. It's proving that another way of providing genuinely affordable homes to rent or buy is possible.

A positive scheme that means communities are not displaced, young people can afford to live in their community and have security, older people can downsize and live in a comfortable, adapted home for life.

Homes are designed and built by local people with consideration of the local housing needs and the environment. MHCLH aims to build high quality, low impact, easy to maintain homes for rent and purchase. They will be owned and managed by the community and not for personal profit.

Helping to Create Truly Affordable Homes for Local People

Wiltshire Community Led Housing Project

OUR VISION

'We aim to create a safe, collaborative and restorative community that treads lightly on the earth.

We shall foster harmony with each other, nature and the wider community.'

In addition we aspire to:

- ◆ Create a beautiful, shared and safe space in which to live, work and play that is nourishing, creative and diverse and will benefit not only the residents but the wider community

- ◆ Be an inspirational model of sustainable and inclusive community living by working together to strive for social and cultural change guided by the principles of equality and sustainability
- ◆ Ensure that our community participates fully in creating a self-reliant and resilient approach to the climate crisis by building high quality, low impact, carbon-neutral dwellings that have the minimum impact on the earth's natural resources
- ◆ Make lifestyle choices that tread lightly on the earth by sharing resources and activities to reduce unnecessary pollution and waste
- ◆ Live independently of each other within a private space but provide love, support and care where and when needed to combat loneliness and isolation and foster personal growth, well-being and happiness

Do these statements appeal to you? Are you interested in living in a sustainable, multi-generational community where everyone supports each other?

Would you like to join us and work with a group of people who have a similar vision?

A New Way of Answering Local Housing Needs

Malvern Hills Community-Led Housing was set up by a group of ordinary people who have the vision to provide truly affordable, good quality, energy-efficient homes built by your community for your community.

We meet regularly on a monthly basis. You can find out more about us at
