Band D (%)	16	<b>13</b>
Band E (%)	14	<b>13</b>
Band F (%)	10	<b>8</b>
Band G (%)	6	<b>7</b>
Band H (%)	1	<b>0</b>

## Interpretation of the Data – Newland

This supplementary document explores some of the underlying data from the profile and links it to the data at a district-level.

<b>Precept</b>	In 2014/15 the average parish precept in Malvern Hills District was £43.66 per household and the range from £100.42 to £1.53. The precept for Newland was £27.78 the 32nd largest out of 53.
<b>Population</b>	Newland is the 40th largest parish in Malvern Hills. Between 2001 and 2011 the population grew by less than 1%, less than the district growth of 3.4%.
<b>Households (dwellings with residents)</b>	The number of households has increased from 158 to 162. Despite the static population, the size of households decreased from 1.94 persons to 1.91 (the lowest in the district). The number of single person households has increased by 9% from 69 to 75 (46% of all households). 88% of single person households are single pensioner households; this has increased by 8% from 61 to 66.
<b>Older people</b>	The number of persons aged 60 and over has increased by 20% from 129 to 155. Persons aged 75 and over have increased by 19% from 62 to 74. The population has aged and that trend is likely to continue.
<b>Children</b>	The number of persons aged 0 to 15 has decreased by 3% from 38 to 37. This downward trend is common to two thirds of parishes.
<b>Deprivation</b>	The Index of Multiple Deprivation shows that 5 households (3.1%) are deprived in three or four of the dimensions of employment, education, housing and health and disability, the district-level percentage is 3.4%. Housing or Council Tax benefit claimants are at the district average and JSA claimants above the district average.
<b>Cars and vans</b>	The number of households with no access to a car/van has increased from 30 to 39. This means that 24% of households rely on other means of transportation.
<b>Health</b>	The percentage of the population reporting good or very good health in each parish ranges from 91% to 75%. In Newland it is 77% (3 <sup>rd</sup> lowest in the district) but the number of people reporting that they are healthy will likely reduce as the population ages.

**Considerations** How to ensure that care and support for older people is sustained and developed as the population continues to age. Working in partnerships with other parishes and the statutory authorities is likely to be helpful particularly for smaller parishes such as Newland.

How to minimise social isolation as the number of single person households increases.

How to sustain and develop public transport services particularly for the 24% with no access to a car or van.

How to ensure that deprived households have access to supporting services and benefits. Promotion of the CAB Community Liaison Volunteers may be helpful.
