Interpretation of the Data - Tenbury Wells

This supplementary document explores some of the underlying data from the profile and links it to the data at a district-level.

Precept In 2014/15 the average parish/town precept was £43.66 per household and the range from £100.42 to £1.53. The precept for Tenbury Wells is £100.42 the largest out of 53.

Population Tenbury Wells is the 4th largest parish/town. Between 2001 and 2011 the population grew by 6%, compared to 3.4 for the district. This does not take into account any housing developments that have taken place since 2011 or any in the pipeline.

Households The number of households has increased from 1318 to 1369. Due to the small population increase, the size of households has decreased from 2.09 persons to 2.14 (3rd lowest in the District). The number of single person households has decreased from 454 to 453 (33% of all households). 60% of single person households are single pensioner households, this has decreased from 277 to 270 (20% of all households). 133 persons live in communal establishments.

Older people The number of persons aged 60 and over has increased by 10% from 991 to 1095. Persons aged 75 and over have increased by 1% from 461 to 467. The population has aged significantly since 2001 and that trend is set to continue.

Children The number of persons aged 0 to 15 has decreased by 4% from 477 to 460. This downward trend is common to two thirds of parishes.

Deprivation The Index of Multiple Deprivation shows that 60 households (4.4%) are deprived in three or four of the dimensions of employment, education, housing and health and disability, at a district-level the percentage is 3.2%.

Cars and vans The number of households with no access to a car/van has decreased from 276 to 241 but this still means that 18% of households rely on other means of transportation.

Health The percentage of the population reporting good or very good health in each parish ranges from 91% to 75%. In Tenbury Wells it is 77% (3rd lowest in the District) but the number of people reporting that they are healthy will likely reduce as the population

ages.

Considerations How to ensure that care and support for older people is sustained and developed as the population continues to age. Working in partnerships with other parishes and the statutory authorities is likely to be helpful.

How to minimise social isolation for single person households.

How to sustain and develop transport services particularly for the 18% with no access to car or van.

How to ensure that deprived households have access to supporting services and benefits. Promotion of the CAB Community Liaison Volunteers may be helpful.
