Band D (%)	16	<b>14</b>
Band E (%)	14	<b>20</b>
Band F (%)	10	<b>20</b>
Band G (%)	6	<b>10</b>
Band H (%)	1	<b>0</b>

## Interpretation of the Data – Lindridge

This supplementary document explores some of the underlying data from the profile and links it to the data at a district-level.

**Precept** In 2014/15 the average parish precept in Malvern Hills District was £43.66 per household and the range from £100.42 to £1.53. The precept for Lindridge was £21.98 the 40th largest out of 53.

---

**Population** Lindridge is the 20th largest parish in Malvern Hills. Between 2001 and 2011 the population growth was 9%, higher than the district-level growth of 3.4%.

---

**Households (dwellings with residents)** The number of households has increased from 267 to 303. Despite the rise in population, the size of households decreased from 2.45 persons to 2.35. The number of single person households has increased by 33% from 46 to 61 (20% of all households). 59% of single person households are single pensioner households; this has increased by 71% from 21 to 36.

---

**Older people** The number of persons aged 60 and over has increased by 74% from 136 to 236. Persons aged 75 and over have increased by 41% from 37 to 52. The population has aged significantly and that trend is likely to continue.

---

**Children** The number of persons aged 0 to 15 has decreased by 15% from 122 to 104. This downward trend is common to two thirds of parishes.

---

**Deprivation** The Index of Multiple Deprivation shows that 8 households (2.6%) are deprived in three out of the four dimensions of employment, education, housing and health and disability, the district-level percentage is 3.2%. Housing or Council Tax benefit and JSA claimants are also lower than the district average.

---

**Cars and vans** The number of households with no access to a car/van has decreased from 19 to 18 but this still means that 6% of households rely on other means of transportation.

---

**Health** The percentage of the population reporting good or very good health in each parish ranges from 91% to 75%. In Lindridge it is 83% but the number of people reporting that they are healthy will likely reduce as the population ages.

---

---

**Considerations** How to ensure that care and support for older people is sustained and developed as the population continues to age. Working in partnerships with other parishes and the statutory authorities is likely to be helpful.

How to minimise social isolation as the number of single person households increases.

How to sustain and develop transport services particularly for the 6% with no access to a car or van.

How to ensure that deprived households have access to supporting services and benefits. Promotion of the CAB Community Liaison Volunteers may be helpful.
