Band D (%)	16	12
Band E (%)	14	26
Band F (%)	10	23
Band G (%)	6	15
Band H (%)	1	1

Interpretation of the Data – Suckley

This supplementary document explores some of the underlying data from the profile and links it to the data at a district level.

Precept	In 2014/15 the average parish precept in Malvern Hills District was £43.66 per household and the range from £100.42 to £1.53. The precept for Suckley was £52.90 the 8th largest out of 53.
Population	Suckley is the 25th largest parish in Malvern Hills. Between 2001 and 2011 the population grew by 10%, much higher than the total district growth of 3.4%.
Households (dwellings with residents)	The number of households has increased from 220 to 262. Despite a significant rise in population the size of households has decreased from 2.50 persons to 2.29. The number of single person households has increased by 67% from 39 to 65 (25% of all households). 48% of single person households are single pensioner households, this has increased by 48% from 21 to 31 (12% of all households).
Older people	The number of persons aged 60 and over has increased by 49% from 130 to 194. Persons aged 75 and over have increased by 39% from 36 to 50. The population has aged significantly and that trend is likely to continue.
Children	The number of persons aged 0 to 15 has decreased by 14% from 99 to 85. This downward trend is common to two thirds of parishes.
Deprivation	However, while Housing or Council Tax benefit claimants are below the District average, JSA claimants are above the District average.
Cars and vans	The number of households with no access to a car/van has decreased from 12 to 5 but this still means that 2% of households rely on other means of transportation.
Health	The percentage of the population reporting good or very good health in each parish ranges from 91% to 75%. In Suckley it is 84% but the number of people reporting that they are healthy will likely reduce as the population ages.

Considerations How to ensure that care and support for older people is sustained and developed as the population continues to age. Working in partnerships with other parishes and the statutory authorities is likely to be helpful.

How to minimise social isolation as the number of single person households increases.

How to sustain and develop public transport services particularly for the 2% with no access to a car or van.

How to ensure that deprived households have access to supporting services and benefits. Promotion of the CAB Community Liaison Volunteers may be helpful.
